Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Muttoni.

There is disclosed in Muttoni a container receiving unit for use with an apparatus for preparing a beverage, the container receiving unit comprising: a receiving space (upper opening of body 1) for receiving a container 5 arranged for holding a beverage base material; a reservoir 4 for containing the beverage; a distribution system, comprising an inlet 20 connected to the reservoir at a bottom thereof, at least two outlets (spouts) 113 for dispensing the beverage, and a liquid flow path extending from the inlet to the outlets; wherein the liquid flow path comprises a V-shaped restriction (located below chamber 26) for evenly distributing the beverage over the two outlets, the restriction including wall sections at the bottom thereof extending into the restriction transversely to the liquid flow path and restricting an area of the flow path.

In regards to claim 6, the chamber 26 would equate to the claimed central transport channel, the V-shaped restriction below chamber 26 would equate to the claimed buffer chamber, and the opening at the bottom of chamber 26 would equate to the claimed restriction.

In regards to claims 7 and 8 the channel which forms spouts 11 would equate to the claimed further restriction and surface.

In regards to claims 9 and 10, it is stated in Muttoni that the container receiving unit is used with a beverage preparing apparatus. And, it is inherently taught that a beverage preparing apparatus comprises a water unit for supplying hot water.

Allowable Subject Matter

Claim 5 is allowed.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
